2. Citations and explanations

Claims 1 and 3 to 6

1. Claim 1:

Document D1 describes (see figure 5) a plastic dispensing head mountable on two parallel hollow actuating rods and made in a single piece, which head includes:

- two parallel coupling sleeves (57a, 57b) engageable with the respective actuating rods and defining respective inlets,
- a dispensing nozzle (59) defining at least one outlet communicating with at least one dispensing port, and
- a cross member (143) connecting the sleeves to the nozzle and defining at least one connecting channel between the inlets and the outlet(s), wherein said at least one connecting channel extends transversely in relation to both the sleeves and the outlet(s), and said at least one connecting channel includes an access opening sealed by a sealing member, which sealing member is integral with the rest of the head.
- 2. Claim 3:

PCT/FR 03/01184

Document D1 describes (see figure 5) a dispensing head according to claim 1, wherein the sealing member is pivotably connected to the head.

3. Claim 4:

Document D1 describes (see figure 5) a dispensing head according to claim 3, wherein the sealing member is pivotably mounted about an axis between an open position and a sealing position.

4. Claim 5:

Document D1 describes (see figure 5) a dispensing head according to claim 4, wherein the sealing member is in the form of a pivotable flap connected to the rest of the head via a bridge of flexible material.

5. Claim 6:

Document D1 describes (see figure 5) a dispensing head according to claim 5, wherein the flap includes a sealing nipple designed to be forcibly inserted into the access opening.

6. It follows that the subject matter of claims 1 and 3 to 6 is not novel (PCT Article 33(2)).
